HTML CSS JavaScript

Bootstrap JQuery Material UI

React Redux

PROJECTS

E-commerce Website

Led the e-commerce website to enhance the user experience and responsiveness by migrating it to React, leveraging the React framework. By eliminating page reloads, I saved time for both the company and customers, resulting in a faster and smoother interface. I managed product data efficiently using JSON. The tools I utilized for this project include Material-UI and Redux.

Project 2

I have developed various types of static web pages during my course, utilizing HTML, CSS, and JavaScript. Additionally, I enhanced login pages with CSS and animations for a more dynamic and appealing appearance.

Moreover, I've expanded my skills by creating web pages with React, making them more efficient and faster. Utilizing JSON, Redux, React, and jQuery as a plugin, I managed to add, update, and remove data seamlessly from the web pages.
